

# Vattenfall IDNO - Better value grid connections

**Vattenfall IDNO is an Ofgem regulated Independent Distribution Network Operator. We specialise in electrical grid connections and provide an alternative to working with your local DNO.**

## **Trusted**

Vattenfall IDNO is part of Vattenfall Group, a Swedish energy company established over 100 years ago. We have more than 1 million electricity network customers throughout Europe.

## **Independent**

Vattenfall is an independent IDNO. Our core focus is establishing safe, reliable, high quality electrical networks. We are open to working with any Independent Connection Provider.

## **Safe**

Safety is our top priority at Vattenfall and one of our core values. We care about the health and safety of our employees, contractors, customers, the environment and wider society.

**When we adopt grid connections we pay business owners and developers an Asset Adoption Value rebate.**

# About Vattenfall IDNO

Vattenfall IDNO provides an alternative to working with your local DNO. We adopt network infrastructure and pay developers an Asset Adoption Value.

We have developed trusted relationships with a network of ICPs who can provide fast response call outs in any area of the UK.

Working alongside your existing Independent Connection Provider (ICP), or via one of our trusted ICPs, we review and approve technical designs and finance the latest climate-smart technologies to power your project.

## Our Services include:

- Grid Connections Consultancy
- Grid applications
- H&S reviews / audits of contractors
- Procurement support
- Design supervision
- Adoption of new connection assets
- Capital provision on adoption
- Lifetime O&M for adopted assets
- Smart technology solutions for capacity constrained developments

## Why choose Vattenfall IDNO?

- We understand complex grid connections
- We are market leading for timely project delivery
- We offer competitive Asset Adoption Value rebates
- We have a wealth of experience working with DNO's and National Grid
- We have a wide network of responsive O&M providers across all areas of GB
- We have a dedicated team and will provide you with a single point of contact
- We have world class supply chain support for infrastructure resilience
- We provide design services to enable your connection designs to be modified
- We can often reduce DNO connection delays and improve project time scales
- We have robust processes, ISO accreditation and conduct thorough H&S audits
- We can reserve capacity for free, so you only pay for the power you take
